AMENITIES

It wasn't enough for us to provide superior views and location for this condo community. We had to ensure we provided the pinnacle of interior selection options. So, we've provided quite the gamut of selections from a variety of hardwood cabinetry with selection of style, wood species and stain and flooring options and/or finishes, granite countertops, and the finest in stainless steel.

The building itself started its life in a far more pedestrian role - it was built at the beginning of the 20th century as a shoe factory. We've kept the 'character features' of the building with its exposed columns, beams and traditional brick work. We then added the features modern condo owners have been requesting in other suburban and urban developments in the market: security systems, exercise rooms, community room, roof top deck, first floor patio areas, decks on the 2nd floor, private storage units, and large master bedrooms and baths.

Think of it this way: with the exposed walls, the high 10 to 16 foot ceilings, massive windows, and the myriad of interior choices, we provide you, the artist, with the blank canvas upon which you can paint your life. And the hundreds of feature selections ensure that each 'creation' will not only reflect the one who created it, but will also have a uniqueness all its own.
